ICBT Campus Project Log Sheet – Supervisory Sessions for CIS6035 -Development Project

Notes on use of the project log sheet:

1. This log sheet is designed for meetings of more than 15 minutes duration, of which there must be at least six (06) during the course of the project (SIX mandatory supervisory sessions).
2. The student should prepare for the supervisory sessions by deciding which question(s) he or she needs to ask the supervisor and what progress has been made (if any), since the last session.
3. A log sheet is to be brought by the student to each supervisory session.
4. The actions by the student (and, perhaps, the supervisor), which should be carried out before the next supervisory meeting, should be noted briefly in the relevant section in the form.
5. The student should leave a copy (after the session) of the Project Log sheet with the supervisor and to the coordinator (for the Manager to include his signature). One copy should be retained with the student.
6. It is compulsory that students bring their previous supervisory session log sheets together with the project file during each supervisory session.
7. The log sheet IS a deliverable for the project, and it is an important record of a student's organization and learning experience. The student MUST hand in the log sheets to the program office after submitting the softcopy to the University along with the hardcopy within 05days of the Turnitin submission.

Student's Name: Rajhalakyaa Mahendrarajah

University Number: 20343574

Date: 04.03.2026 **Meeting No**:05 **Intake**: **May 2025**

Project Title: Web based Gym Management System

Supervisor's Name: **Mr.N.Jayapriyan** **Supervisor Signature**: N. Jeyapiriyan
Manager's Name: T.Sutharsan **Manager's Signature**:
.

Work progression as to date (noted by student BEFORE mandatory supervisor meeting):

Before the sixth supervisory meeting, I completed the major development tasks of the Web-Based Gym Management System. All system modules including member management, trainer management, staff management, attendance tracking, and revenue monitoring were fully integrated with the database. The role-based dashboard for admin and other users was also implemented successfully.

I tested the user interface and confirmed that all UI functions are working properly with the backend system. I also conducted system testing to verify the functionality and performance of the application. Additionally, I enhanced the system by including basic analytical features for monitoring gym performance and membership trends. A reminder feature was also incorporated to notify users about important events such as membership renewals.

Furthermore, I finalized the Testing and Evaluation section of the report and continued improving the overall project documentation, including the introduction, literature review, methodology, system design, and implementation sections.

Items for Discussion (noted by student BEFORE mandatory supervisor meeting):

During this meeting, I planned to present the completed system and testing results to my supervisor. I also intended to seek feedback on the system performance, analytical features, and reminder functionality implemented in the application. Additionally, I wanted guidance on final improvements that may be required before submitting the final project report.

Action List (to be attempted by student by the NEXT mandatory supervisory meeting – TO BE FILLED SUPERVISOR):

The supervisor advised me to make final improvements to the system performance and documentation where necessary. I was instructed to review the Testing and Evaluation section and ensure that all results are clearly explained in the report. The supervisor also recommended verifying that all project requirements are satisfied and preparing the final project report and submission materials before the project submission deadline.

Note: A student should make an appointment to meet his or her supervisor (via phone call or e-mail) at least 3 days prior to supervisory session. In the event a supervisor could not be booked for consultation, the Manger should be informed 2 days prior to supervisory meeting so that a meeting can be subsequently arranged.
