ICBT Campus Project Log Sheet – Supervisory Sessions for CIS6035 -Development Project

Notes on use of the project log sheet:

1. This log sheet is designed for meetings of more than 15 minutes duration, of which there must be at least six (06) during the course of the project (SIX mandatory supervisory sessions).
2. The student should prepare for the supervisory sessions by deciding which question(s) he or she needs to ask the supervisor and what progress has been made (if any), since the last session.
3. A log sheet is to be brought by the student to each supervisory session.
4. The actions by the student (and, perhaps, the supervisor), which should be carried out before the next supervisory meeting, should be noted briefly in the relevant section in the form.
5. The student should leave a copy (after the session) of the Project Log sheet with the supervisor and to the coordinator (for the Manager to include his signature). One copy should be retained with the student.
6. It is compulsory that students bring their previous supervisory session log sheets together with the project file during each supervisory session.
7. The log sheet IS a deliverable for the project, and it is an important record of a student's organization and learning experience. The student MUST hand in the log sheets to the program office after submitting the softcopy to the University along with the hardcopy within 05days of the Turnitin submission.

Student's Name: Rajhalakyaa Mahendrarajah

University Number: 20343574

Date:07.03.2026 **Meeting No**: 06 **Intake**: **May 2025**

Project Title: Web based Gym Management System

Supervisor's Name: **Mr.N.Jeyapiriyan** **Supervisor Signature**: N. Jeyapiriyan

Manager's Name: T.Sutharsan **Manager's Signature**:

.

Work progression as to date (noted by student BEFORE mandatory supervisor meeting):
Before the final supervisory meeting, I completed the development of the Web-Based Gym Management System. All core modules including member management, trainer management, staff management, attendance tracking, class scheduling, and revenue monitoring were successfully implemented and integrated with the database.

The role-based dashboard system was finalized to allow different user roles such as admin and trainers to access relevant functionalities. The user interface was improved and tested, ensuring that all UI functions work properly with the backend system.

In addition, I conducted system testing, including functional testing and performance testing, to verify that the system operates correctly and efficiently. I also enhanced the system by adding analytical features for monitoring gym performance and membership data, as well as implementing a reminder feature for membership renewals and notifications.

Furthermore, I completed the Testing and Evaluation section and finalized all sections of the project report, including the introduction, literature review, methodology, system design, implementation, and testing results. The project documentation is now ready for submission.

Items for Discussion (noted by student BEFORE mandatory supervisor meeting):
For this final meeting, I planned to present the completed system and the final project report to the supervisor. I also intended to discuss the system testing results and evaluation outcomes. In addition, I wanted to receive feedback on the overall project implementation and confirm whether the project meets the required academic and technical standards before submission.

Action List (to be attempted by student by the NEXT mandatory supervisory meeting – TO BE FILLED SUPERVISOR):
The supervisor reviewed the completed system and project report and confirmed that the project development and documentation have been completed successfully. I was advised to perform final proofreading and formatting of the report and ensure that all submission requirements are met before submitting the final project to the university.

Note: A student should make an appointment to meet his or her supervisor (via phone call or e-mail) at least 3 days prior to supervisory session. In the event a supervisor could not be booked for consultation, the Manger should be informed 2 days prior to supervisory meeting so that a meeting can be subsequently arranged.
