ICBT Campus Project Log Sheet – Supervisory Sessions for CIS6035 -Development Project

Notes on use of the project log sheet:

1. This log sheet is designed for meetings of more than 15 minutes duration, of which there must be at least six (06) during the course of the project (SIX mandatory supervisory sessions).
2. The student should prepare for the supervisory sessions by deciding which question(s) he or she needs to ask the supervisor and what progress has been made (if any), since the last session.
3. A log sheet is to be brought by the student to each supervisory session.
4. The actions by the student (and, perhaps, the supervisor), which should be carried out before the next supervisory meeting, should be noted briefly in the relevant section in the form.
5. The student should leave a copy (after the session) of the Project Log sheet with the supervisor and to the coordinator (for the Manager to include his signature). One copy should be retained with the student.
6. It is compulsory that students bring their previous supervisory session log sheets together with the project file during each supervisory session.
7. The log sheet IS a deliverable for the project, and it is an important record of a student's organization and learning experience. The student MUST hand in the log sheets to the program office after submitting the softcopy to the University along with the hardcopy within 05days of the Turnitin submission.

Student's Name: Rajhalakyaa Mahendrarajah

University Number: 20343574

Date:14.12.2025 **Meeting No**:01 **Intake**: **May 2025**

Project Title: Web based Gym Management System

Supervisor's Name: **Mr.N.Jayapriyan** **Supervisor Signature**: N. Jeyapiriyan

Manager's Name: T.Sutharsan **Manager's Signature**:

.

Work progression as to date (noted by student BEFORE mandatory supervisor meeting):
I completed the requirement-gathering phase for the Web-Based Gym Management System and discussed the overall system architecture. I also started working on the implementation part of the project by writing initial code for basic system functionalities. Additionally, I reviewed the database structure and explored how different system modules will interact with the database.

Items for Discussion (noted by student BEFORE mandatory supervisor meeting):
During this meeting, I planned to discuss the overall project structure and the initial code implementation with my supervisor. I also wanted feedback on the database design and guidance on connecting the system to the database. In addition, I sought clarification on best practices for implementing core modules and organizing the admin-side functionalities.

Action List (to be attempted by student by the NEXT mandatory supervisory meeting – TO BE FILLED SUPERVISOR):
The supervisor instructed me to begin developing the admin dashboard and establish a proper database connection for the system. I was also advised to implement basic admin functionalities such as login, data viewing, and management features. Furthermore, the supervisor recommended ensuring that the database design supports future features and to continue improving the code structure before the next supervisory meeting.

Note: A student should make an appointment to meet his or her supervisor (via phone call or e-mail) at least 3 days prior to supervisory session. In the event a supervisor could not be booked for consultation, the Manger should be informed 2 days prior to supervisory meeting so that a meeting can be subsequently arranged.
