ICBT Campus Project Log Sheet – Supervisory Sessions for CIS6035 -Development Project

Notes on use of the project log sheet:

1. This log sheet is designed for meetings of more than 15 minutes duration, of which there must be at least six (06) during the course of the project (SIX mandatory supervisory sessions).
2. The student should prepare for the supervisory sessions by deciding which question(s) he or she needs to ask the supervisor and what progress has been made (if any), since the last session.
3. A log sheet is to be brought by the student to each supervisory session.
4. The actions by the student (and, perhaps, the supervisor), which should be carried out before the next supervisory meeting, should be noted briefly in the relevant section in the form.
5. The student should leave a copy (after the session) of the Project Log sheet with the supervisor and to the coordinator (for the Manager to include his signature). One copy should be retained with the student.
6. It is compulsory that students bring their previous supervisory session log sheets together with the project file during each supervisory session.
7. The log sheet IS a deliverable for the project, and it is an important record of a student's organization and learning experience. The student MUST hand in the log sheets to the program office after submitting the softcopy to the University along with the hardcopy within 05days of the Turnitin submission.

Student's Name: Rajhalakyaa Mahendrarajah

University Number: 20343574

Date: 23.02.2026 **Meeting No**:04 **Intake**: **May 2025**

Project Title: Web based Gym Management System

Supervisor's Name: **Mr.N.Jayapriyan** **Supervisor Signature**: N. Jeyapiriyan

Manager's Name: T.Sutharsan **Manager's Signature**:

.

Work progression as to date (noted by student BEFORE mandatory supervisor meeting):

Before the fifth supervisory meeting, I continued improving the Web-Based Gym Management System by completing additional system modules and integrating them with the database. I worked on implementing the role-based dashboard functionality, allowing different user roles such as admin, trainer, and staff to access relevant system features.

I also focused on improving the front-end user interface and system navigation to ensure that all functions work correctly with the backend database. In addition, I began conducting system testing, including functional testing of key modules such as member management, trainer allocation, attendance tracking, and revenue tracking. I also started preparing the Testing and Evaluation section of the project report by documenting the testing methods and results.

Items for Discussion (noted by student BEFORE mandatory supervisor meeting):

For this meeting, I planned to discuss the testing strategies used in the system, including functional testing and user interface testing. I also wanted feedback on the role-based dashboard implementation and confirmation that the system modules are structured correctly. Additionally, I intended to discuss how to improve the Testing and Evaluation section of the project report and ensure that the system meets the required academic and technical standards.

Action List (to be attempted by student by the NEXT mandatory supervisory meeting – TO BE FILLED SUPERVISOR):

The supervisor advised me to finalize the remaining system functionalities and improve system performance where necessary. I was instructed to complete all testing activities and document the results clearly in the Testing and Evaluation section of the report. The supervisor also recommended enhancing the system by adding analytical features, performance benchmarking, and a reminder or notification setup to improve the usability and effectiveness of the system before the final supervisory meeting.

Note: A student should make an appointment to meet his or her supervisor (via phone call or e-mail) at least 3 days prior to supervisory session. In the event a supervisor could not be booked for consultation, the Manger should be informed 2 days prior to supervisory meeting so that a meeting can be subsequently arranged.
